ITALIAN SPECIAL RULES

The *Regio Esercito* (the Royal Army, pronounced Re-jee-oh Eh-sehrr-chee-toh) was unprepared for war in 1940, despite Mussolini's call for an army of '8 million bayonets'. The resulting force is very uneven—some officers are excellent, while others are simply abysmal, and the training of their soldiers and these special rules reflect this.

AVANTI!

The Italian army learned many lessons from the First World War. From the Germans they took the concept of speed and mobility in breakthrough operations. From the French they gained the techniques of methodical destruction of the enemy defences. The resulting doctrine emphasised mobile warfare and demanded rapid movement into contact with the enemy before bringing massive firepower to bear to open a gap and allow manoeuvre once more.

Any Italian platoon with a Command team may attempt an Avanti move at the start of its Shooting step instead of shooting. If a platoon attempts to make an Avanti move, it may not shoot even if fails to make an Avanti move.

Roll a Motivation test for each platoon:

- *If the test is successful, the platoon may move another 4"/10cm,*
- *Otherwise the platoon cannot move this step.*

All of the normal rules apply for this movement. Platoons cannot make Avanti moves if they are Pinned Down or moved At the Double. Bugged Down or Bailed Out vehicles cannot make Avanti moves.

PACK MULES

Gun teams carried by Pack Mule teams are Mountaineers, see page 61 of the rulebook. Pack Mule teams are Transport teams. Pack Mule teams carry Gun teams as Passengers and the Gun team is removed from the table while it is carried by the Pack Mule team.

HEROISM

The Italian army's lack of modern equipment gave its officers plenty of opportunities to display extreme *eroismo*, heroism. Because these great deeds were usually fatal to the hero, it was impossible to know in advance who the heroes were, though if their comrades survived, their deeds would be enshrined in heroic prose and a medal sent to their dearest.

When your company first has a Command team Destroyed by the enemy shooting or assault (but not as a result of a failed Platoon Morale Check), roll a Motivation Test for that Command team. This test can never be re-rolled for any reason.

- *If they pass the Motivation Test, the officer shrugs off his wounds, shouts encouragement to his men and a challenge to the enemy, and fights on as an Unknown Hero.*
- *On any other roll, the Command team is Destroyed as normal and you roll again to discover your hero the next time a Command team is Destroyed.*

Once you have found your Unknown Hero, stop rolling. There can only be one Unknown Hero in your company in each game.

If the Unknown Hero is an Infantry team, bring the team back into play. If the Unknown Hero was a Tank team, the hero transfers to any other tank in his platoon that is within Command Distance making that the Platoon Command team. If no suitable tank is within Command Distance, the Unknown Hero is out of the battle and removed from the game.

An Unknown Hero and any platoon led by him always pass Motivation tests on a roll of 2+. If the Unknown Hero is Destroyed while leading a platoon, the platoon will continue to take Motivation tests as if led by the Unknown Hero, although all other penalties for being Out Of Command still apply.

EARLY-WAR 8 MILLION BAYONETS

Mussolini demanded an army eight million strong to create his new Roman Empire. The rapid expansion needed for this led to reservist officers being recalled to the colours with little extra training. After 20 years of civilian life, some were still good soldiers, however most were not!

To reflect the variable quality of Italian officers, Italian platoons are rated as Regular, Black Shirt, Elite, or Artillery. After deployment, but before the first turn, roll a die for each platoon and its attached teams and consult the Early-war 8 Million Bayonets table to determine their Training and Motivation characteristics.

FUCILIERI

The *Fucilieri* (or riflemen, pronounced Foo-chee-lyearr-ee) represent the bulk of the Italian forces. However, the Torino and Pasubio divisions were both motor transportable units and considered a well-trained elite.

The conscript riflemen of the Fascist militia of the CCNN (Black Shirts) only have very basic training, and much of that is very old fashioned.

ELITE

The Elite 3rd *Principe Amedeo Duca D'Aosta Celere* or 'fast' division was made up of Italy's best troops, the cavalry and the Bersaglieri light infantry. This division was the spearhead of the Italy operations in Italy and had an excellent reputation among the Italian's German Allies.

ARTILLERY

The hardest fighting troops in the Italian army are the artillerymen. They are selected from the best recruits and have the most intense, technical, and professional training. They also fight very bravely, often defending their guns to the last man.

MOTIVATION AND SKILL

*Torino and Pasubio were considered very well-trained divisions by the Italians. A Battaglione Fucilieri is rated as **Elite**.*

*The CCNN Black Shirt fascist militia only receive basic and old fashioned training, but are often willing to get into the thick of battle. A Black Shirt Battaglione Fucilieri is rated as **Black Shirt**.*

Despite Mussolini's boasts, the Italian army was unprepared for a war with Greece. Chaotic mobilisation meant conscripts were sent to Albania without training just as the veteran troops were removed from the theatre after serving their term in the army. The poor Italian supply chain meant units were badly equipped for the conditions they were about to face. Despite these issues the Italians dutifully went to war.

Gun teams equipped with Pack mules are rated as Man-packed Gun teams and are Mountaineers.

The old, yet reliable, *cannone da 65/17 modello 13* mountain gun proved to be a valuable asset providing close support to the Italian infantry. It could be broken down and transported on packhorses, making it ideal for supporting an attack in the rough Greek terrain.

The gun's high explosives made it perfect for destroying enemy machine-guns and anti-tank guns, opening the way for Italian infantry to attack.

Expecting to fight a war in the Alps, the Italian army ensured that all of its support weapons were man-portable. The light *cannone da 47/32 modello 35* anti-tank gun was perfect for the mountainous conditions in Greece since it could be broken down and carried by troops. Its low silhouette helped keep the gun hidden from enemy fire. Combined with the gun's high rate of fire and high explosive shells made them excellent infantry support weapons.

The Italians also received a handful of the German 3.7cm PaK36 light anti-tank guns, designated as the 37/45 anti-tank gun. While the performance was similar, the gun's armoured shield offered the crew a bit more protection.

These additional weapons could also respond to a need for a quick barrage to break up enemy attacks, destroy guns, or conceal manoeuvre under a smoke bombardment.

The small tankettes of the *Centauro* Division could have been valuable if used in the right terrain and in the right season. However, in Greece they were deployed in areas with few roads that had already been churned to mud and many had to be left behind in the 1940 Italian retreat.

Remember, a Hull MG cannot fire at the same time as a hull-mounted main gun.

CAVALLERIA PLATOON

HQ Section with:

3 Cavalleria Squads 130 points

The Italian cavalry, like that of other nations, has undergone a period of reform and transformation into the mounted infantry combat role. Their mounts provide them with the mobility needed to cross difficult terrain and get around the enemy's flanks. Though the change of doctrine has taken full effect they still remember the cavalry tradition and retain their mounted abilities.

The core of a Squadroni di Cavalleria are the Cavalleria Platoons. These skilled fighting men can perform equally well in the infantry and cavalry roles. They are armed with the Carcano 91/38 carbine with folding bayonet and the Breda 30 machine-gun. They carry the modello 1871 cavalry sabre for mounted fighting.

The SS and a few elite motorised divisions are mounted in trucks. These motorised formations are able to keep pace with the fast moving panzer spearheads that lead the advance.

The bulk of the German infantry travel on foot. This does not diminish there fighting ability or importance to the German war effort.

STUKA SCHWERPUNKT

The role of the *Luftwaffe* (Air Force) in Operation Barbarossa was to focus its efforts at the breakthrough points, totally dominating the air above the battle.

If you establish a Stuka Schwerpunkt (see the option for Priority Air Support above), you roll two dice on the How Many Aircraft Table and take the best result.

The Junkers Ju 87B dive bomber was known by both sides as the Stuka (an abbreviation for the German word for dive bomber). The bent wing silhouette of the Stuka epitomised Blitzkrieg warfare, developing a fearsome reputation during the Polish campaign, which it further enhanced with massed dive-bombing attacks during the Battle of France. They were once more in action during Operation Barbarossa, leading the assault on Soviet airfields and troop concentrations.
